

Country Analysis

Mexico, Peru, Chile, and Brazil

Eugenia Andreassen, Paula Margaretic, Ean Paredes, Tomás Fernández

November 2025

Requirements vs. Completed Analysis - Overview

Status Legend: Complete | Partial/Issue | Missing/Impossible

Country	Required	Completed	Additional	Status
Mexico	2	2	+4	(CHL-6) (2 impossible)
Peru	4	4	+3	
Chile	6	5.5	+3	
Brazil	4	2	+6	
Total	16	13.5/16	+16	30 graphs

Key Issues:

- **Chile CHL-6:** Currently uses chl_02 (TF by banks) instead of chl_07 (L/C by banks) - duplicates CHL-2
- **Brazil bank graphs:** No bank-level data available in public SCR; generated regional alternatives instead

Requirements vs. Completed - Detailed Comparison

MEXICO [2/2 required] + 4 additional

Required: L/C as % of total liabilities → MEX-2

Required: L/C by type of bank (Foreign/Domestic) → MEX-3

- Additional: MEX-1 (L/C monthly volume), MEX-4 (L/C % exports), MEX-5 (L/C % trade), MEX-6 (L/C top 5 banks)

PERU [4/4 required] + 3 additional

Required: TF as % of total credit → PER-1

Required: TF by borrower size → PER-2

Required: TF by type of bank → PER-3

Required: Market concentration (HHI + top banks) → PER-4

- Additional: PER-5 (TF % exports), PER-6 (TF % trade), PER-7 (TF top 5 banks)

CHILE [5.5/6 required] + 3 additional

Required: TF as % of total loans → CHL-1

Required: TF by type of bank → CHL-2

Required: Market concentration (HHI) → CHL-3

Required: Interbank foreign funding → CHL-4

Required: L/C as % of liabilities (comparable to Mexico) → CHL-5

Required: L/C by type of bank → CHL-6 ERROR: uses chl_02 (duplicates CHL-2), should use chl_07

- Additional: CHL-5b (L/C monthly), CHL-7 (TF % exports), CHL-8 (TF % trade), CHL-9 (TF composition)

BRAZIL [2/4 required] + 6 additional (2 impossible due to data limitations)

Required: TF as % of total credit → BRA-1

Required: TF by borrower size (comparable to Peru) → BRA-2

Required: TF by type of bank → IMPOSSIBLE: No bank identifiers in BCB public data

Required: Market concentration → IMPOSSIBLE: No bank identifiers in BCB public data

- Additional: BRA-3 (TF by region), BRA-4 (regional concentration), BRA-5 (size distribution Peru-comparable), BRA-6 (TF % exports), BRA-7 (TF % trade), BRA-8 (TF by sector)

Data Characteristics Summary

Characteristic	Mexico	Peru	Chile	Brazil
Bank-level data	✓	✓	✓	×
Firm size breakdown	×	✓	×	✓
Economic sector	×	×	×	✓
Geographic region	×	×	×	✓
Total liabilities	✓	×	✓	×
Instrument type (L/C)	✓	×	✓	×
Period	2022-2025	2010-2024	2022-2024*	2012-2024
Observations	2,204	13,785	28,729	838,166

Key Notes:

- **Chile*:** Full series 2015-2024 available, but analysis uses 2022-2024 only (CMF period) due to accounting system break
- **Brazil:** No bank-level data in public SCR; compensated with detailed borrower characteristics
- **Trade data:** Global Macroeconomic Database (GMD) used for exports/imports across all countries

① Data Sources and Methodology (7 slides)

- Overview and comparability
- Country-specific data characteristics
- GMD integration

② Mexico Analysis (6 graphs)

③ Peru Analysis (7 graphs)

④ Chile Analysis (9 graphs)

⑤ Brazil Analysis (8 graphs)

Total: 30 graphs across 4 countries

Data Sources Overview

Country	Period	Source	Coverage
Mexico	2022-2025	CNBV Reporte A-1219	Letters of Credit (account 202401504003)
Peru	2010-2024	SBS Balance de Comprobación	Foreign-trade credit portfolio
Chile	2015-2024	CMF API (Bancos)	Trade finance accounts (29 accounts CMF period)
Brazil	2012-2024	BCB Monthly Reports	Foreign-trade credit (aggregate only)

Trade Data Source: Global Macroeconomic Database (GMD) for annual exports and imports across all four countries.

Mexico: Data Characteristics

Source: CNBV Reporte A-1219

Coverage:

- Account 202401504003: Import Letters of Credit
- Monthly frequency: January 2022 - August 2025
- Bank-level data: 53 institutions
- Includes total liabilities for percentage calculations

Limitations:

- Only captures short-term import L/C
- Export L/C and other trade instruments not included
- Period: 2022-2025 only

Source: SBS Balance de Comprobación (Resolución SBS N° 11356-2008)

Coverage:

- "Comercio Exterior" credit portfolio
- Monthly frequency: October 2010 - December 2024
- Bank-level data: 19 institutions
- Borrower characteristics: firm size, region

Limitations:

- Does not separate by instrument type
- Firm size data incomplete for some periods
- Aggregate "foreign-trade credit" category

Chile: Data Characteristics and Accounting Break

Source: CMF API - Información Financiera de Bancos

Coverage:

- 2015-2021: SBIF accounting (11 trade finance accounts identified)
- 2022-2024: CMF/IFRS 9 accounting (29 accounts identified)
- Monthly frequency, bank-level data: 27 institutions
- Includes total liabilities (account 2000000000) for CMF period

Accounting Transition:

- **January 2022: Structural break** (SBIF → CMF/IFRS 9 transition)
- 0% account code overlap between periods
- **Analysis uses CMF period only (2022-2024)** for consistency
- Jump in 2022 reflects account identification change (11 → 29 accounts)

Brazil: Data Characteristics

Source: BCB Monthly Reports

Coverage:

- "Comércio Exterior" credit operations
- Monthly frequency: January 2012 - December 2024
- 838,166 observations
- Borrower characteristics: firm size, sector, geographic region

Limitations:

- No bank-level data (publicly available data aggregated only)
- Cannot analyze bank concentration or top institutions
- Does not separate by instrument type

Global Macroeconomic Database (GMD) Integration

Purpose: Calculate trade finance intensity metrics

Variables Used:

- Annual exports (USD millions)
- Annual imports (USD millions)
- Total trade = exports + imports

Data Source Change:

- **Previous:** BACI/CEPII bilateral trade database
- **Current:** Global Macroeconomic Database (GMD)
- **Reason:** BACI/CEPII latest available data only extends through 2023. GMD provides data through 2024-2025.

Methodology:

- Monthly TF stock divided by annual trade flows
- Enables cross-country comparisons of TF penetration
- Example: $\text{tf_pct_exports} = (\text{monthly_tf_stock} / \text{annual_exports}) \times 100$

Data Comparability Across Countries

Comparable Metrics:

- TF as % of exports (intensity measure)
- TF as % of total trade (broader penetration)
- Market concentration patterns
- Bank type distributions

Non-Comparable Aspects:

- **Coverage:** Mexico (L/C only) vs. others (all TF credit)
- **Granularity:** Brazil lacks bank-level data
- **Time periods:** Different available ranges per country
- **Accounting systems:** Chile 2022 break, revisar.
